

DHEERAJ NICHENAMETLA

Python Backend & Full-Stack Developer

Anantapur, Andhra Pradesh, India | +91 8019479721 | dheerajnichenametla@gmail.com
Portfolio: dheeraj-portfolio-xr8g.vercel.app | LinkedIn: [nichenametla-dheeraj](https://www.linkedin.com/in/nichenametla-dheeraj) | GitHub: [NichenametlaDheeraj](https://github.com/NichenametlaDheeraj)

PROFESSIONAL SUMMARY

Motivated Computer Science student and **Python Backend & Full-Stack Developer** with expertise in building scalable web applications using Python, Django, REST APIs, and MySQL. Proficient in modern frontend technologies including React, JavaScript, and responsive CSS. Strong background in object-oriented programming, data structures, and database management, currently expanding skills in Machine Learning, Data Analysis (Pandas, NumPy), and Generative AI.

TECHNICAL SKILLS

- **Languages & Backend:** Python, Django, REST APIs, Object-Oriented Programming (OOP), SQL
- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Responsive Web Design
- **Databases & Tools:** MySQL, PostgreSQL, Git, GitHub, Postman, VS Code, Jupyter Notebook, Google Colab
- **Data Science & AI (Learning):** Pandas, NumPy, Machine Learning Fundamentals, Generative AI

FEATURED PROJECTS

KRISHISETU — Agriculture Marketplace Web App | *React, Django, MySQL, REST APIs*

- Architected a full-stack digital agriculture marketplace connecting farmers directly with end consumers.
- Implemented secure user authentication, interactive product catalog, dynamic cart management, and order tracking APIs.

Inventory Management System | *Python, MySQL, Desktop GUI*

- Engineered a desktop application for real-time inventory tracking, automated billing, and customer record management.
- Designed MySQL relational database schemas for stock updates, sales analysis, and owner security dashboard.

Movie Ticket Booking System | *Python, OOP, Database*

- Built a modular booking application supporting movie schedule management, interactive seat allocation, and ticket generation.
- Incorporated owner authorization controls and streamlined transaction flow for error-free booking operations.

Mobile Recharge & Management System | *Python, Data Validation*

- Developed a telecom management platform providing SIM card validation, custom recharge plans, and transaction history tracking.
- Enforced real-time balance calculations and user plan notifications using Python data structures.

Bike Rental Management System | *Python, File/Data Operations*

- Created a bike rental tracking system featuring customer onboarding, vehicle availability logs, and dynamic billing.
- Automated rental tracking calculations and return verification to streamline daily fleet operations.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science (2023 – 2026)

Government Degree College (Autonomous), Anantapuramu

- Coursework: Computer Science Fundamentals, Data Structures, Relational Database Systems, Operating Systems, Web Technologies.

Python Full Stack Development Course (Dec 2025 – Jul 2026)

- Comprehensive training in building end-to-end applications with Python, Django backend APIs, React interfaces, and MySQL databases.

Intermediate (Higher Secondary - MPC) (2021 – 2023)

Nalanda Junior College, Vijayawada

- Higher Secondary Education with focus on Mathematics, Physics, and Chemistry.

Secondary School Certificate (SSC / 10th) (Completed 2021)

Nava Bharath English Medium School

- Secondary School Education with strong foundation in Science and Mathematics.

KEY ACHIEVEMENTS & METRICS

- **10+ Projects Completed:** Built and deployed multiple backend & full-stack software applications.
- **20+ GitHub Repositories:** Actively maintaining open-source code and structured technical projects.
- **300+ Problems Solved:** Practiced algorithmic problem-solving across core Python and Data Structures.
- **1000+ Hours of Hands-on Coding:** Dedicated development in Python, Django, MySQL, and Web Technologies.
